### **DETAILED ACTION**

1. The after final response of 11/18/04 has been received and considered.

#### ***Allowable Subject Matter***

2. Claims 31-32 & 40-41 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding claims 31 & 40, the prior art relied upon fails to teach or suggest shifting the output from the nonlinear transform unit by the specific number of bits calculated by the procedures in the claim ( $1/2$  the number of bits of the output or by the number of bits obtained by adding an integer multiple of the number of bits of the output to the half number of bits).

Regarding claim 32 & 41, the prior art relied upon fails to teach or suggest the expansion key calculation unit/EX-An adding with carry-up (p. 15 of the instant specification) the output from the expansion unit/E1 and the second key/ $K_n$  (Fig. 1). The prior art teaches adding using modulo-2 (XOR) addition, which does not use carry-up.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
